Features of the Automatic Vibration Tester

How You Can Receive Only Zero Defect Noise Tested Bearings

*Any Quality Defects Cost
Compensation And Reputation,
Zero Defect Ends Up The Cheapest*

A story that's always been heard

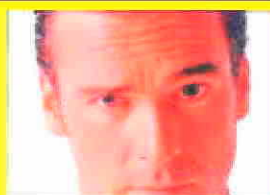

Seller says: Our bearings' quality is the best in China with defective rate less than 1%.

Congratulations, here are your 100 pieces of bearings with 99% qualified.

Buyer says: Wait a minute! I'm producing one million parts per year, and now you are telling me that we'll have 10,000 defects in a year, just because of your 1% defective rate!

Buyer says: You have to realize that our products using your bearing are very expensive. We couldn't even afford to have any single defect. Your 1% is nothing but too far away from that.

Buyer says: We choose none but the best. You got to pick the single defect out of these 100 bearings and give be the rest.
